-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 26 February 2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 20-29 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 20-29 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 26, 2004 has been entered.
2. This Office action is in response to the amendment filed January 20, 2004 in which claims 20, 24 and 27 were amended.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Gakkaishi.

Gakkaishi teaches a composition comprising sodium chlorate, 20-60 wt% iron, diatomaceous earth (binder), sodium perborate (oxygen generating compound) and strontium peroxide. See abstract in its entirety.

Art Unit: 1714

Accordingly, Gakkaishi teaching all the limitations of the claims anticipates the claims.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhang (US 5,783,105).

Zhang teaches an oxygen generating composition comprising 0.5-15% by weight of tin powder as a fuel, from 0-15% by weight of a transition metal oxide catalyst, about 0.5-5% by weight of an alkaline compound as a chlorine remover and reaction rate modifier, an oxygen source selected from the group consisting of alkali metal chlorates, alkali metal perchlorates and mixtures thereof and up to about 5% of a binder (see abstract). The alkaline compound acting as a chlorine remover and reaction rate modifier may be a peroxide such as strontium peroxide (see column 4, lines 38-50). The preformed chlorate is sodium chlorate and the preferred perchlorate is potassium perchlorate (see column 5, lines 7-12). The binder may be glass powder, glass fiber, ceramic fiber, etc. (see column 4, lines 56-65). Zhang teaches the limitations of the claims other than the difference that is discussed below.

Zhang does not specifically desire iron as the metal fuel. However, it would have been obvious to one of ordinary skill in the art to have used iron as the metal because

Art Unit: 1714

Zhang does teach that iron is a known metal fuel that has been combined with the remaining claimed additives to produce an oxygen generating composition. The skilled artisan recognizes that with the use of iron that more CO will be released and a higher temperature of operation will be required (see col. 3, lines 65-67; col. 4, lines 1-11). Furthermore, Applicant's claims (24-29) do not require the presence of iron metal.

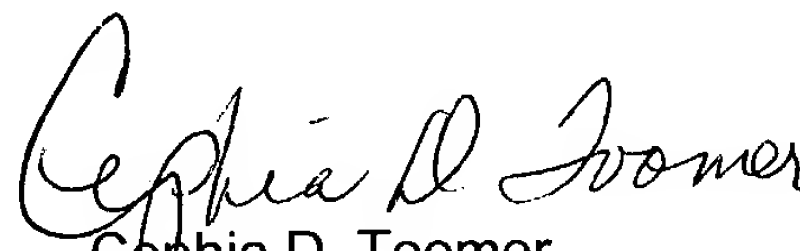

Zhang does not teach that the alkaline compound (strontium peroxide) is a catalyst. However, no unobviousness is seen in this difference because Zhang does not require a catalyst and if strontium peroxide functions as a catalyst in the present invention it would also function as a catalyst in the composition of Zhang.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cephia D. Toomer whose telephone number is 571-272-1126. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
